

AVOX Systems

9800 Series Portable Oxygen Systems

The AVOX Systems 9800 Series is a self-contained, supplementary oxygen and respiratory protection system offering either demand or pressure demand, and constant flow capabilities for aviation use, thereby providing dual purpose efficiency.

For emergency use, the demand flow operates with the 10100/10800 Mask to protect the crew from hazardous smoke and fumes. The portability and lightness of the unit allow the crew to continue performing necessary duties, since there is little restriction of movement.

The constant flow operation with oral-nasal mask provides the crew and passengers with supplemental oxygen when needed. Masks are not included with the assembly.

Outstanding Features

- DOT 3AA1800 rated 11.0 cubic foot high pressure oxygen cylinder
- Up to 2 constant flow outlets
- High pressure safety outlet assembly
- Fingertip controlled on-off valve
- Pressure gauge to show oxygen supply
- Low pressure relief valve
- Demand regulator and pressure regulator
- Sling type carrying strap
